

AV INSTALLATIONS: GLIMPSES

A Spotlight on AV Excellence Spanning India

Bringing Sound to Life at Lourde Church with Avient Technologies

Avient Technologies delivers world-class precision with the pro AV integration at Lourde Church's large and reverberant space, bringing meaningful audio experiences to life.

This remarkable audio transformation has taken place in Thiruvananthapuram, where an advanced sound system has been thoughtfully designed and installed to elevate every moment of worship. The setup features the robust QSC K12.2 loudspeakers, known for their power and clarity, paired with the dependable QSC GXD4

amplifier to deliver consistent, high-quality performance. Complementing this is the compact yet impressive Electro-Voice EVID 4.2 series, adding refined acoustic detail to the overall soundscape.

The installation was executed with precision by a trusted

partner, Media Village Binil C Amakkadu. Their expertise ensured that the system integrates seamlessly into the church's architecture, addressing the challenges of its large and naturally reverberant interiors. The result is an immersive audio environment where every

sermon, choir rendition, and prayer reaches the congregation with warmth, depth, and exceptional clarity.

This project stands as a testament to the power of collaboration and premium technology coming together to enrich sacred spaces.

Proedge Infotech Transforms a Bangalore Space with Striking Samsung Video Wall

Another standout AV installation has been completed in Bangalore, led by the skilled team at Proedge Infotech. This project features the impressive Samsung VM55B Video Wall, a display known for its crystal-clear visuals, ultra-slim bezels, and exceptional performance. As Samsung continues to de-

fine the standard for premium video wall solutions, this installation exemplifies just how powerful and dynamic their

technology can be in modern environments. Set up for one of the Bangalore AV partner's prestigious

customers, the video wall is designed to deliver immersive visual communication, making it ideal for mission-critical applications where precision and clarity matter most. The result is a seamless, high-impact visual experience tailored perfectly to the customer's needs.

Proedge Infotech remains committed to supporting AV and IT partners across India with a distribution-only approach, distinctly different from distributors who compete with their own partners. Their focus is on strengthening partner capabilities, helping them scale with confidence, and shaping the future of digital experiences.

Adaero Tech Transforms a University Sports Complex with Advanced AV Technology

Adaero Tech announced the successful implementation of a state-of-the-art audio-visual system at one of the leading universities in the NCR region. Designed and executed by AV professionals, the installation brings a new level of immersion and engagement to the campus sports complex, enhancing both visual impact and audio clarity.

Key Highlights of the Installation:

LG LED Video Wall: A striking

52 ft x 10 ft display with a fine 2.5 mm pixel pitch, capable of functioning as a single expansive screen or multiple segmented displays for flexible content delivery.

Tannoy Sound System: Carefully placed speakers and woofers that provide uniform and powerful audio coverage throughout the sports complex.

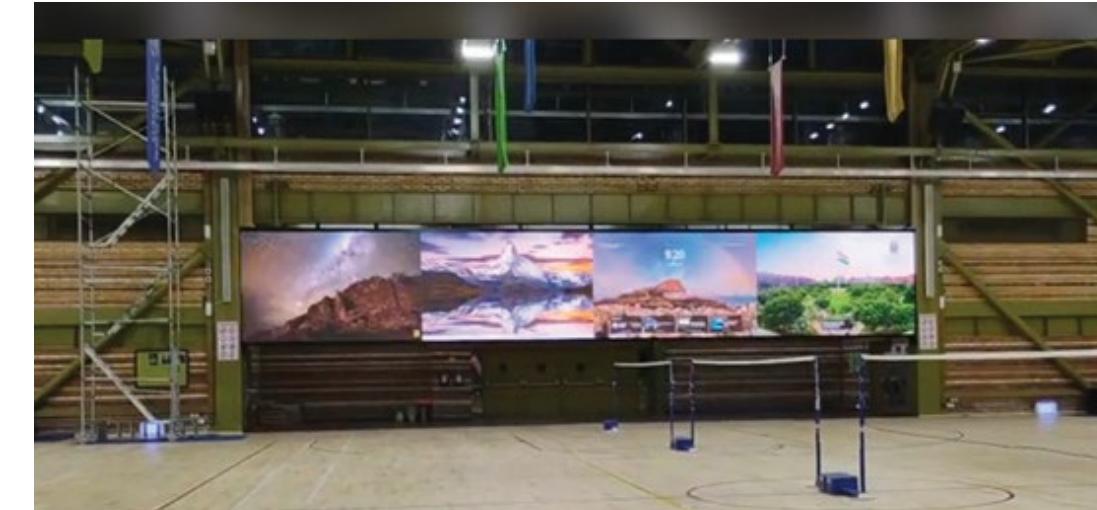

Lab Gruppen Amplifiers: High-performance amplification ensuring precise, crystal-clear sound output.

Music Tribe Audio Processing: Advanced signal enhancement to elevate the overall auditory experience.

Adaero Tech specialises in crafting AV solutions tailored for large-scale environments. For

this project, the technical team conducted a thorough assessment of the sports complex's unique acoustical and spatial needs.

The result is a thoughtfully engineered AV design that delivers balanced sound dispersion and vibrant visual performance across the venue.

Resurgent AV Delivers a Future-Ready Divisible Training Room for a Global MNC

Resurgent AV, one of the leading systems integrators, has successfully delivered a highly adaptable Divisible Training Room (DTR) for a global MNC, marking another milestone in advanced workplace AV innovation. Designed to meet a wide range of training formats, the space can transform effortlessly from one large collaborative environment to multiple smaller rooms tailored for focused sessions.

The installation features seamless AV integration, enabling quick and smooth

switching between combined and divided room modes. Intuitive control systems ensure that users can operate the space with ease, regardless of configuration. With its future-ready

design, the solution empowers the client to enhance training efficiency, flexibility, and collaboration across teams.

Committed to provide AV excellence and world-class inte-

gration, Resurgent AV remains dedicated to building intelligent AV environments that support organisations as they learn, connect, and evolve.
