

SHOW PREVIEW: AV-ICN EXPO 2026

AV-ICN Expo 2026 once again sets the floor for pro AV seekers to experience, learn, and transform the Indian professional audiovisual market. Standing as one of India's definitive knowledge-exchange platforms and exhibiting cutting-edge displays, AV-ICN brings together global technology leaders and the country's fast-evolving AV ecosystem under one roof. More than just an exhibition, it serves as a convergence point where collaboration and networking steal the show.

Over the course of three high-energy days, AV-ICN Expo, held alongside PALM, offers visitors an opportunity to explore a wide spectrum of next-gen technologies, including advanced LED displays, digital signage solutions, projection systems, and much more. The experience goes beyond static displays, with immersive product demos, hands-on interactions, and thoughtfully curated knowledge sessions at the AV-ICN Conference and Seminar led by key industry professionals. Complementing this is a strong focus on skill development through a comprehensive CAVS Certification Program, along with the prestigious AV-ICN Excellence Awards that recognise innovation and excellence in the pro AV industry.

Last year marked a significant milestone, with around 26,000 unique attendees at the combined PALM AV-ICN Expo. This year, the expo is poised to build on that success and set new benchmarks for scale, engagement, and industry impact. Taking place at the NESCO Exhibition Centre, the event will span Halls 2, 3, 4, and 6 along with other high-end showcases including the HARMAN Live Arena, The Vibe by N-Labs, and Rigging and Trussing workshops, creating a comprehensive showcase across diverse segments. With halls 2 and 4 dedicated to pro audio, hall 6 to lighting and SFX, and hall 3 to professional AV, the exhibition promises a well-structured and immersive experience for industry professionals across various technologies and solutions. Attendees will experience high-end showcases and innovations across the PALM AV-ICN show floor once again with over 350 leading exhibitors, displaying 1000 plus brands.

"For 24 years, PALM AV-ICN has served as India's premier sourcing platform for the professional sound, lighting, and AV industry. True to our motto 'Delivering Business,' the expo has consistently connected buyers with cutting-edge solutions and industry leaders. As we approach 2026, we stand at the threshold of a transformative era that will accelerate our industry into its next phase of growth. With significant investments flowing into technology-driven infrastructure projects nationwide, our commitment is to position PALM AV-ICN Expo at the forefront of this business revolution. We're not just witnessing change – we're driving it."

— RAMESH CHETWANI, Show Director,
PALM AV-ICN Expo

AV-ICN'S SOLUTION-DRIVEN SHOWCASE: AN EXPO DESIGNED TO EXPLORE, COLLABORATE, AND NETWORK

Immersive experiences, vibrant showcases, and the collaboration spirit. AV-ICN brings a platform inviting visitors not just to explore but to network with skilled veterans, pioneering brands, system integrators, consultants, and end-users. From product showcases and hands-on technology experiences to witnessing the prestigious gathering, the expo offers a unique opportunity to every pro AV enthusiast.

Elevating industry standards and preparing it as a dedicated knowledge-sharing platform, the expo's highlight features including the Certified AV Specialist Course, AV-ICN Conference and Seminar, and the AV-ICN Excellence Awards, reflect AV-ICN's aim to train, educate, and inform the pro AV industry on the market push and tailored AV solutions designed for the transforming technological era.

Certified AV Specialist [CAVS] Course: Advancing Pro AV Careers

As always, Certified AV Specialist [CAVS] course will return as the highlight of AV-ICN Expo, designed to elevate industry standards and expertise. With the objective to advance professional development through this comprehensive program, CAVS aims to provide an independent neutral education forum, with accredited faculty and researched study information, suited to the Indian AV ecosystem. AV fundamentals taught to candidates in the three-day course with exams and certification is intended to upgrade integration teams on protocols and standards in today's rapidly evolving technological environment.

The 8th CAVS edition will take place along with the AV-ICN Expo providing comprehensive AV training on three power-packed days – Pro Audio on Day 1, Video on Day 2, and Integration Networking on Day 3.

AV-ICN EXPO 2026: BRINGING INDIAN PRO AV UNDER ONE ROOF

Certified AV Specialist (CAVS) Course organised by AV-ICN Expo continuing its mission to strengthen India's AV knowledge base with Narendra Naidu

The curriculum is structured as follows:

Day 1: 28th May 2026 (10:30 AM - 4:00 PM)

Trainer: Narendra Naidu, Chairman & Managing Director, Rhino Engineers Pvt. Ltd.

Theme: PRO AUDIO

Day 2: 29th May 2026 (10:30 AM - 4:00 PM)

Trainer: Abdul Waheed, Managing Director at EYTE Technologies Pvt. Ltd.

Theme: VIDEO

Day 3: 30th May 2026 (10:30 AM - 5:00 PM)

Trainer: Satyanarayana Reddy, Technical Manager India, SAARC, The Siemon Company

Theme: INTEGRATION NETWORKING

To secure your spot for CAVS 2026, contact **Smita Rai** - smita.rai@informa.com | +91 9820943398

Expanding on its scope to train and inform, AV-ICN Expo also paves a way for pro AV enthusiasts to discover latest pro AV trends, disruptive technologies, and AV transformations through its thoughtfully curated conference sessions at the AV-ICN Expo 2026.

AV-ICN Conference and Seminar 2026: A Vital Knowledge-Sharing Hub

Sharing the show floor with key AV specialists and technical experts, AV-ICN Expo is set to bring its industry-leading conference programme once again, serving as a vital knowledge-sharing platform across the three days of the event. Bringing together thought leaders, systems integrators, AV consultants, and technology professionals, the sessions at AV-ICN Conference and Seminar, being held at the AV Hall (Hall 3), intend to deliver deep insights into emerging trends and cutting-edge technologies transforming the professional AV landscape. The conference topics will cover disruptive technologies, pro AV trends, and the future of pro AV, making it indeed an excellent networking opportunity for all AV professionals.

Speakers' names to be disclosed soon!

Hall 3 also centres around the latest display technologies at the expo. As visitors navigate the hall, they will discover trending innovations and the latest product launches on the show floor, a preview of which is featured below.

Establishing A Definitive Platform for the Visual Display Market in India

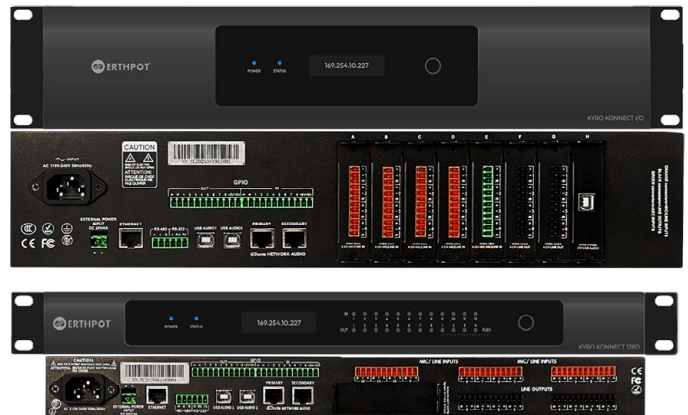

This year's showcase reflects a noticeable shift in industry momentum, with a strong emphasis on visual display technologies

Conference Session held at AV-ICN Expo 2025 discussing "Revolutionising AV: The Impact of AV over IP and 5G on Modern AV Systems"

such as LEDs, digital signages, and advanced projection systems. Here, we highlight the latest pro AV innovations and on-floor display launches as planned by AV-ICN exhibitors for the show floor.

Showcasing for the first time in India is Erthpot's Kyro Konnect 128D and Kyro Konnect I/O. Kyro Konnect 128D is a high-capacity digital audio networking solution designed to manage large-scale audio routing with efficiency and clarity. Built to handle complex system requirements, it supports high channel density, making

Erthpot to introduce Kyro Konnect 128D at AV-ICN Expo 2026, a high-capacity digital audio networking solution

it suitable for conference environments, corporate setups, and integrated audio installations. At the show, it will be presented as a practical solution for managing high-channel audio networks where control, flexibility, and organised signal flow are essential. Kyro Konnect I/O is designed to simplify the integration of analog and digital audio systems within a networked environment. It acts as a bridge between different audio sources and destinations, enabling smooth signal conversion and distribution. Suitable for conference rooms, commercial spaces, and installed audio setups, the system allows users to connect microphones, processors, and other equipment into a unified workflow. At the show, it will be showcased as a reliable interface solution for integrating multiple audio components into a cohesive and efficient network.

Pixel LED, one of the rental & staging LED solutions, LED video wall, and LED screen providers, is also set to launch Grand 500 Series, redefining indoor visual excellence. Available in P2.6 and P2.9-pixel pitches, Grand 500 Series ensures crystal-clear image quality, high pixel density for close viewing distances, and smooth visuals with exceptional colour uniformity. With its ultra-fine pixel technology, the LED series caters to corporate, retail & showrooms, broadcast studios, conference & control rooms, and hospitality & experience centres.

displays. Addressing the needs of homes, businesses, and commercial enterprises, Epson has an enviable reputation for quality and value. Headquartered in Bangalore, the company markets and supports 3LCD Projectors and so much more.

Enbon LED, one of the leading LED display manufacturers in China, presents a wide range of rental stage series, outdoor LED displays, COB fine LED displays, and indoor LED displays. The brand's products cover two series of direct plug-in (DIP) and SMD surface mount, which fully meets the requirements of different point spacing, visual distance, brightness and environmental requirements for applications.

Hawaii LED, one of the providers of cutting-edge LED displays, offers full-service solutions tailored to the needs of the customers. With 13+ years of expertise and operations in India, Qatar, UAE and Saudi Arabia, the brand ensures stunning performance from installation to ongoing support. AV solutions include rental and staging cabinets, commercial display, and video processors.

Newtech Video Systems Pvt. Ltd., one of the manufacturers, traders, distributors, and importers of LED video walls, LED video wall cabinets, LED video processors, video wall splicers, and much more, is also expected to showcase its products and solutions at the show floor. The brand's claim to success is hallmarked by offered quality products that have gained huge recognizance in the industry.

Jona LED is a renowned brand, offering a wide range of LED display screens to enhance resolution. The brand has emerged as one of the leading LED display makers and is known for its quality product and services. Jona LED is committed towards creating, manufacturing, and selling best LED products, including indoor/outdoor LED displays for fixed/rental applications, curved LED video walls, fine pixel pitches, and LED van displays, which are expected to be displayed at the AV-ICN show floor.

Yeon LED leads the way in LED display innovation, merging creativity with excellence. Dedicated to revolutionising visual encounters, the brand specialises in crafting state-of-the-art LED screens that redefine clarity, vibrancy, and adaptability. At AV-ICN Expo, Yeon is expected to present indoor and outdoor LED displays covering rental, conference, and exhibition LED displays, along with studio floor and 3D LED walls.

Cavitak Group is a distribution-driven technology organisation with nearly four decades of industry experience. From its beginnings in distribution, the group has grown into specialised business verticals including home automation and audiovisual solutions. Cavitak has partnered with some of the leading global brands and

Other exhibitors including **Epson, Enbon LED, Hawaii LED, Newtech Video Systems, Jona LED, Yeon LED, Cavitak, Apna Studio, and Bright Pixel** will also be participating once again at AV-ICN Expo 2026, showcasing world-class innovations and pro AV solutions at the show floor.

Epson, one of the leading projector manufacturers, is coming back to the AV-ICN show floor with its segments including home theatre projectors, large venue projectors, business and education projectors, and interactive flat panel

system integrators to deliver reliable and future-ready technology solutions across India. At AV-ICN Expo 2026, the distributor is expected to showcase cutting-edge solutions from brands including **Crestron, Electro-Voice, Bosch, BrightSign, tvONE, and Vestel**.

Bright Pixel and **Apna Studio** are also set to showcase their LED products at the show floor once again, demonstrating the industry's dedication to expand AV applications across the country.

Exhibiting for the first-time is **Singh LED**, one of India's most respected manufacturers of LED display products. Investing significantly in R&D and launching numerous new products each year, the brand holds a strong portfolio, supported by a global distribution network of leading traditional and online retailers. With the aim to establish a global footprint for advanced LED solutions, Singh LED is recognised for its solutions including outdoor and indoor cabinets, LED scrolling boards, media players, and processors, which will be displayed at AV-ICN Expo this year.

Delivering Light Planning, one of the high-end LED lighting product manufacturers, will also share its presence with other exhibitors for the first-time at the show floor and is expected to display its best range of table lamps, led searchlights, lamps, and spotlights.

Another first-time exhibitor, **Infipixel** – a Chinese-based LED manufacturer, is expected to exhibit world-class solutions at the show floor from its range of innovations including commercial displays, rental displays, COB displays, and kinetic displays. Infipixel offers one-of-a-kind design for tours, events, or installations through its award-winning line of LED video wall and video screens. Working with architects, designers, engineers, and consultants, Infipixel has developed custom LED solutions for every customer while also providing top-tier customer support with the entire experience.

Stepping Beyond the Conventional Setups: N-Labs to Deliver Immersive, Multi-Sensory Experiences

If there is one exhibitor rewriting the rules of what a show floor experience can look like, it is **N-Labs**. Housed across the sweeping expanse of both **Grande B** and **C**, **The Vibe by N-Labs** is not simply

a product display, rather an immersive, multi-sensory journey through the evolving landscape of professional audio. N-Labs has something unique planned for each day of the expo, delivering distinctly flavoured live performances, running from 2:00 PM to 6:30 PM in 15-minute windows for up to 80 attendees at a time. Day 1 will open with the timeless elegance of classical Indian

music. Day 2 shall pivot to the expansive, dynamic world of western music and vocals. The finale for Day 3, a breathtaking classical flute-based immersive audio session is slated to bring the curtain down in spectacular fashion, showcasing spatial audio at its most nuanced and transcendent.

Ahead of the live performances, N-Labs plans to ensure the mornings focus on professional education and skill development. Thoroughly detailed tech sessions, accommodating up to 300 attendees, will offer industry professionals a penetrating look at the technologies powering N-Labs' ecosystem. Bridging the two will be a captivating cinematic demo experience merging live performance and cinematic audio design that blurs boundaries without sacrificing an ounce of quality.

For the technically inclined, N-Labs will offer guided tours through the intricate, behind-the-scenes workings of live sound engineering — a rare and privileged glimpse into the signal chains, system architectures, and engineering craft that bring a live performance to life.

On the technology front, N-Labs will be presenting live Audio over IP demonstrations alongside innovations in open-source integrations across Milan AVB, AES67, and Dante-enabled platforms, with flexible PoE connectivity solutions rounding out the lineup. A range of new product unveilings is also on the cards, making this a booth well worth visiting.

AV-ICN EXCELLENCE AWARDS 2026: AN EVENING TO HONOUR INDUSTRY ACHIEVEMENTS

Recognising the outstanding achievements of industry professionals in the pro AV industry, AV-ICN Excellence Awards shares a splendid platform honouring professional excellence across key categories. These awards recognise technological innovations, project excellence, and the visionary professionals and brands that continue to push the boundaries of AV integration in India and beyond.

Taking place on Day 2 of PALM AV-ICN Expo once again this year, the 3rd edition of AV-ICN Excellence Awards is set to gather industry leading professionals and integrators, celebrating some of the exceptional accomplishments from across the country.

**Categories to be disclosed soon!*

CONCLUSION

As the industry continues to evolve, AV-ICN Expo 2026 stands as a

Recognising AV excellence across India, AV-ICN platform honours the innovation and craftsmanship behind venue integrations, from intimate spaces to large-scale installations

powerful reflection of where pro AV is headed. By bringing together visual technologies, AV expertise, and real-world applications, the exhibition creates a platform for meaningful engagement and discovery. For professionals across the AV ecosystem, it is not just an event to attend, but an opportunity to connect, explore, and stay ahead in a rapidly advancing pro AV landscape.
