

SYSTEMS INTEGRATORS AND AV CONSULTANTS IN INDIA

India's professional AV industry has been undergoing a remarkable technological evolution in recent years. The surge in experiential technologies and seamless connectivity has redefined how systems integrators and AV consultants approach project delivery across sectors such as corporate, education, government, hospitality, and retail. Today's clients demand solutions that are not only technologically sophisticated but also scalable, sustainable, and centred around immersive experiences.

Recognising this dynamic shift and the growing strategic role of AV professionals, *AV-ICN Expo Magazine* proudly presents its special edition featuring the **"Top 50 Systems Integrators and AV Consultants in India."** This curated list celebrates the professionals who are no longer just technical solution providers, but strategic partners shaping the future of AV infrastructure in the country.

The editorial team has adopted a comprehensive evaluation approach — one that reflects the increasingly blurred lines between system integration and consultancy. With many integrators offering consultancy services and vice versa, our selection is based on the merit of accomplished projects, and the impact these experts have made in design, engineering, and execution across varied domains.

The listing showcases companies that are delivering excellence across the spectrum. While some firms are executing high-impact, large-scale AV installations, others are making significant contributions through comparatively smaller, specialised projects. Regardless of size, each company featured has demonstrated a strong commitment to integrating cutting-edge AV technologies, adhering to industry best practices, and enhancing user experiences — earning their place among the top 50.

For over three years, AV-ICN Expo Magazine has been a trusted source of insights, trends, and innovations in India's pro AV ecosystem. Through this feature, we aim not only to spotlight 50 standout companies driving AV excellence, but also to showcase the broader wave of innovation and growth that these firms represent.

Each company on the list exemplifies the evolving role of AV professionals. By highlighting their achievements, we also reflect the momentum and ingenuity propelling India's AV integration and consultancy landscape forward.

INTEGRATION DONE RIGHT: THE O2K MODEL

WHAT CLIENTS REALLY WANT

What clients really want isn't more AV—they want fewer problems. Simpler meetings. Systems that just work. Over the last 25+ years, O2K has evolved to meet that need not just through technology, but through the way we think about integration.

At O2K, integration doesn't begin with hardware. It begins with questions. What is this space trying to do? Who's going to use it? And how to make that experience effortless?

Meeting those expectations isn't about promises—it's about structure, ownership, and follow-through. And that's exactly where O2K sets itself apart.

INTEGRATION BUILT ON OWNERSHIP

O2K doesn't outsource accountability. Every piece of the project, from the first design to final support, sits with one team, under one roof. No third-party handoffs. No ambiguity. Just clear ownership.

That clarity has allowed the company to deliver over 7000 AV projects across industries and geographies. Clients like Capgemini, DuPont, HUL, EY, PWC, TomTom and IIT-M have worked with them not just for years, but for decades because they know what they build lasts, and they'll be there when it counts.

BUILT FOR SCALE. GROUNDED IN INDIA

O2K's reach spans India. The company has scaled carefully, not just in numbers, but in depth. Their 189-member team includes AVIXA CTS-certified and Crestron MastersCertified, a rare credential in India, alongside solution architects, developers, and support engineers — each aligned with a consistent standard of technical and delivery excellence.

DESIGN TO DAILY USE: END-TO-END, IN PRACTICE

Nearly 98% of their projects start with an in-house design because design done right saves time, reduces risk, and sets the foundation for great user experiences.

The brand aligns rooms with real behaviors. Map out infrastructure in detail. Anticipate bottlenecks. And then follow through with tight implementation and post-deployment care.

Our SLAs aren't just numbers on paper—they're tracked daily through structured checklists and automated reporting. Uptime is measured. Issues are pre-empted. Support is transparent.

But designing great systems isn't enough. They still need to function flawlessly—day after day, across teams and locations. That's where our focus on operational clarity comes in.

SHAPING THE INDUSTRY, NOT JUST SERVING IT

O2K has never been just about deployment. The company believes integration must serve not only today's needs, but also the industry's future. That belief led the company to build:

The **Beyonders Centre** – An INAVATE APAC award-winning AV lab where clients can experience real-world setups across use cases—from training rooms and digital signages to immersive projection and hybrid-ready meeting rooms. This isn't a mock-up space. It's a working environment where clients test before they invest.

The **Crestron Sightline Room** – Built in collaboration with Crestron, Shure, and Samsung, this space showcases platform-native collaboration, AI-powered camera switching, and intuitive voice tracking. It has also been used to demonstrate real-time collaboration with Crestron's Bangalore facility—bridging two cities in a single meeting experience.

A CULTURE THAT BUILDS LOYALTY

Over 40 of our team members have stayed more than five years. 22 have stayed over ten. That kind of tenure is rare in our industry—and it reflects something deeper. At O2K, people don't just deliver—they shape what they build. Engineers help develop tools. Designers evolve workflows. The team doesn't just run training—they run an academy. They don't manage careers—they grow people into leaders.

That same commitment to culture is shaped at the top. Our CEO, **Ms. Prabha Lakshmi**, is an AVIXA Women's Council member, a recipient of the AVIXA Women in AV Award, and the Crestron Paramount Achievement Award. Her leadership reflects a larger vision—of inclusion, mentorship, and sustained technical excellence—not just within O2K, but across the AV industry.

The stability created inside the company has allowed them to respond with clarity when the world outside becomes more volatile.

A ROLE THAT'S EARNED, NOT CLAIMED

Being a system integrator is not about what you install—it's about what your client trusts you with. Their time. Their spaces. Their teams.

O2K doesn't see itself as a vendor. They see themselves as long-term partners who make systems work—not just at handover, but in the times that follow.

That's what they've built for 25 years and that's what they'll keep delivering.

That's what makes O2K a system integrator.

PYRAMID TECHNOLOGIES

Over 20 years of Engineering speaking for itself....

For over two decades, Pyramid Technologies has quietly shaped some of India's most complex large venue projects — airports, monuments, convention centres, political headquarters through precise, high-performance engineering. Founded in 2002, what began as a modest integrated building systems integrator is today a nationwide powerhouse in audio-visual systems, projection mapping, media façades, and complex AV engineering projects.

With its headquarters in Mumbai and a national project footprint, Pyramid operates with ISO 9001:2015 certified processes and with advanced platforms like BIM to produce coordinated, high-accuracy system designs. But it is their ability to execute high-stakes, full-scale deployments in record time and maintain 99.9% uptime through round-the-clock service that truly sets them apart.

Pyramid Tech has consistently delivered at a scale. Its next major undertaking is the Navi Mumbai International Airport (NMIAL), where the company is delivering mission-critical Public Address and Voice Alarm systems along with a large-format LED media wall and backend processing for control room

operations — a project that demands absolute precision and reliability.

A LEGACY OF LANDMARK PROJECTS

- **Statue of Unity & Sardar Patel Museum, Gujarat** – The 182-metre statue animated by large-scale 3D projection mapping and Lasers from a distance of 620 metres away create an immersive AV Spectacle. The museum at the foot of the Statue was also equipped with interactive digital exhibits, video walls, and an immersive theatre, all completed in record timelines showcases their significant achievement.
- **Yashobhoomi (IICC), New Delhi – AV Systems** – At India's largest convention centre, Pyramid delivered a benchmark in event infrastructure. A 5,775-unit interpretation system, powerful sound for a 6,000-seat auditorium, immersive AR/LED displays, and next-generation broadcast systems together enable world-class events on an unprecedented scale.
- **Yashobhoomi (IICC), New Delhi – LED Media Façade** – Spanning 360°, an immersive spectacle of innovation and scale, at 8,800 sq.m, this installation is India's first and largest digital façade.

Tackling the challenges of a 44.5° angled structure, at a height of 45 metres, Pyramid's precision engineering turned architecture itself into a dynamic canvas of light and motion, redefining how urban spaces communicate. The façade has become a landmark in itself, symbolising

the fusion of architecture and digital artistry on an unprecedented scale in India.

- **Kempegowda International Airport, Bengaluru (T2)** – Bengaluru's new terminal, Pyramid executed a fully redundant Public Address and Voice Evacuation system. Integrated with assistive listening and flight announcement systems across the terminal, it ensures uninterrupted communication in both daily operations and emergencies, raising benchmarks for passenger experience and aviation safety.

COMMITMENT BUILT ON TRUST

What unites these diverse projects is a disciplined framework and a culture of reliability. More than 80% of Pyramid's business comes from repeat clients, a clear reflection of long-term trust and consistent delivery. The path forward is guided by the same principle: building environments that connect people and stand the test of time.

With each project, Pyramid seeks to play a consistent role in shaping environments that support India's progress....

QUBIX TECHNOLOGIES

Year of Establishment: 1985

Number of Projects Completed: 3500+

Highlight Projects: Nab, Delhi (HiTech Office setup); Axa, Pune; JLL JBS, Delhi; Ice Data, Hyderabad; Sattva, Hyderabad; Deltin, Goa; JW Golfshine Marriott, Bangalore

The mark of true luxury is effortless. That's what Qubix delivers — homes, hotels, and workplaces where every system, from audio to automation, responds instantly and elegantly. The lights, the sound, the screens, the networks — everything fades into the background, leaving only the experience. That's by design.

For more than 35 years, Qubix Technologies has been reimagining how people live, work, and celebrate by blending audio-visual, IT, lighting, and IoT into environments that feel effortless.

From designing India's largest façade lighting projects that turn skylines into canvases, to creating celebrity homes where an entire theatre, security system, and multi-room audio respond to a single voice command — Qubix thrives at the intersection of innovation and imagination.

For enterprises, Qubix builds more than boardrooms. Think 8,000-seat auditoriums with flawless acoustics, immersive experience centres for global brands, and hybrid townhalls where latency is measured in milliseconds. Add to that a 2-hour service response time — unmatched in the industry — and it's clear why more than 1100 projects across 30 cities have been accomplished by Qubix.

At Qubix, innovation isn't about the hardware you see. It's about the magic you feel when you forget it's there.

SAR BUILDCON

Year of Establishment: 2023

**Highlight projects completed: 50ft x 10ft L-Shaped LED Screen, Mumbai;
15 Indoor LED Screens at Patna Airport; Airport Lounge Signage – Pan
India; Retail & Hospitality Screens in Malls**

SAR Buildcon specialises in end-to-end turnkey execution of LED screen installations, structural fabrication, and digital signage solutions. With a relentless focus on precision, speed, and quality, they have delivered some of the most iconic outdoor and indoor digital display installations across India. Whether it's a 50 ft. façade at a bustling urban junction or a complex airport signage setup, the team approaches every project with engineering rigor and aesthetic finesse.

Core Offerings

- **LED Screen Installation (Indoor & Outdoor):** From pixel-pitch planning to final mounting, we specialise in installing LED screens for retail facades, airports, malls, corporate lobbies, and more.
- **Structural Design & Fabrication:**

We handle structural design, load-bearing evaluations, fabrication, and onsite erection tailored for each screen geometry—including challenging formats like L-shaped and curved screens.

- **Digital Signage Consultation:** We collaborate with brands and digital signage partners to consult on screen placement, visibility angles, integration with content systems, and longevity.
- **Turnkey Project Execution:** One partner, complete responsibility — from drawing evaluations to completion, our team ensures timely, cost-efficient, and high-quality execution.

Credibility

- **Pan-India Presence:** Projects executed in cities including Mumbai, Patna, Bengaluru, Hyderabad, and Pune – with consistent delivery timelines.

- **Trusted by Leading Brands:** Its clientele includes top clothing brands, salon chains, airports, and retail developers – testament to ability to deliver excellence under pressure.
- **Zero Rework Track Record:** The team takes pride in a flawless delivery culture, completing projects on spec, time, and budget- without a single instance of rework.
- **Preferred Partner for Digital Signage Giants:** SAR Buildcon is often the execution backbone for some of India's biggest digital signage companies – thanks to their technical finesse, speed, and reliability.

ACTIS TECHNOLOGIES is a technology solutions provider that enhances environments by creating smarter and more human-centric infrastructure. The integrator blends technologies to improve collaboration, audio visual experiences and lighting management in offices, residences, retail and other commercial environments. Starting its AV integration practice in 1999, the brand accomplished landmark projects like Akshardham Temple, Mahindra & Mahindra and Global Telesystems. In fact, Actis, as of now, has received more than 45 awards over the last 2 decades from partners, customers and the industry, in recognition of its teams' achievements.

ADJM TECHNOLOGIES is a team of passionate AV professionals dedicated to providing top-notch audio-visual solutions. ADJM Technologies, headquartered in Mumbai, was established by Anand D. Mistry in the year 2009. With tie-ups with more than 80 manufacturers for high-end AV systems and a completely trained technical team with latest and updated innovative technologies, ADJM has accomplished more than 500 projects successfully pan-India. Some of their highlight projects include integration in educational institutes like IIT Bombay and JVM College, corporates like BMC offices, and other high-end hospitality and government venues.

ALLWAVE-AV SYSTEMS is one of India's leading audio-visual integrators & unified collaboration solution providers, transforming workplaces with advanced collaboration solutions for over two decades. Established in 2000 and headquartered in Mumbai, the company has delivered 2,800+ projects for 1,300+ clients across industries. With 100+ skilled professionals and offices in Pune, Bangalore, Hyderabad, Chennai, NCR, and Kolkata, Allwave-AV combines strong pan-India presence with global reach through its PSNI Global Alliance membership. Some of its highlight projects include installations in BCG, MorningStar, Yesbank, Apollo Global, and Forrester.

ANUVIN CONSULTANTS provides expert consultancy and aligns to support client's business objectives with the technology solutions that is appropriate to all needs. The consultant has the skills and resources to design and develop innovative converged technology solutions with more than 10 years of wide-ranging expertise across all sectors including assisting government ministries to architects, real estate, hospitality and other market segments. Some of their achievements include integration for National Building Construction Company, Central Public works Department, Rail India Technical & Economical Services, PSU under Min of Railways, JLL, C&W, CBRE, AECOM, and many more.

WE WELCOME SUBMISSIONS, PORTFOLIOS, AND PROJECT HIGHLIGHTS!

In this edition, we are proud to present a curated listing of 50 distinguished Systems Integrators and AV Consultants in India who have consistently demonstrated excellence in delivering AV integrations across the country. **If your company is not featured in this spotlight**, and you feel your recent work reflects the calibre and creativity we aim to showcase, we encourage you to reach out to our editorial team for future consideration. For those already listed, we encourage you to take this moment further by submitting your most compelling recent work. Do **share this listing on your social media platforms** for maximum reach. Let us amplify your achievements and share your story with the wider professional community!

ARUP was founded in 1946 and has been delivering paired design and engineering through many verticals across diverse segments. Standing tall in many regions across the globe, Arup is one of the leading AV design and advisory practices, delivering infrastructure and systems that bring incredible sound and vision to every kind of environment. As a global consultancy with technical expertise across more than 150 disciplines, Arup has industry leading experience allowing the team to shape audio and visuals for delivering extraordinary experiences.

AVID has utilised many years of international experience to develop integrated audio-visual system solutions and meet the demands of the AV industry. Staffed by a team of professional and experienced designer and engineers, AVID has provided some of the most sophisticated and innovative solutions undertaken in. As market leaders in the arena of audio-visual integration, they offer complete design, installation and maintenance solutions. AVID has offices and presence in several cities in India including Bangalore, Chennai, Hyderabad, Kolkata, Mumbai and New Delhi, and have installed numerous prestigious projects in the Asia Pacific region. AVID has also its International Office in Dubai, UAE.

AVI-SPL helps enterprise organisations ignite confidence and curiosity, integrate a consistent global technology strategy, and increase efficiency. The team works to design simple, innovative, and personalised solutions, providing AV, UC, and experiential technology solutions that drive results. AVI-SPL has delivered more than 120,000 projects in across 100 countries with 4,400 global employees working dedicatedly to provide world-class pro AV services across the globe. Some segments focused on by the integrator include commercial real estate, financial services, higher education, federal government, and healthcare.

Event Production, Video, Interactive Media

CLARITY CONSULTING is an international consultancy with offices in Bengaluru, Mumbai, Pune, Ahmedabad, Delhi, and Dubai offering services in acoustics, audio-visual, architectural (interior, landscape and façade) lighting, ICT/IoT, and Technology Programme Management. With Clarity having worked in Asia/MENA/India for the last 30+ years, this has given Kelvin Ashby-King (Principal Consultant), Rashi Vachhani - Director, and the team untold opportunities that they would never have in the western world, where they would be categorised into a specific area of design/vertical. Being located in this dynamic region has allowed them work on projects that cover the complete spectrum of audio visual, lighting, ICT, and acoustics.

COLCOM, a proud member of the **ESCO Pte. Ltd. Group** (established in 1989), has been a trusted name in the audio-visual industry since its founding in 2019. As one of the leading AV systems integrators, COLCOM specialises in delivering advanced, integrated technology solutions tailored to diverse business needs. Headquartered in Mumbai, with a strong presence across the Indian region, they bring 35+ years of collective expertise in designing, implementing, and supporting professional audio-visual systems, delivering more than 1000 unique installations so far. They specialise in customising AV and UC solutions for offices to busy restaurants, designed for effortless operation.

COSMOS BUSINESS MACHINES, established in 1994 and headquartered in Mumbai, is a company that provides audio-visual solutions. The systems integrator specialises in delivering high-quality AV services and have experience working with major organisations across various industries, including BFSI, hospitality, pharmaceuticals, media & entertainment, government, and education with more than 500 projects completed so far. Cosmos Business Machines has a well-established network across India, with offices in Mumbai, Pune, Ahmedabad, New Delhi, Chennai, and Cuttack. The integrator operates with a focus on innovative products, timely delivery, and ethical business practices. Some of its highlight projects include installations in venues like IOCL, NABARD, BPCL, ONGC, and BITSOM.

CMPL (COMMUNICATION MEDIA PRODUCTS) is backed by over 25 years of pertinent audio-visual industry experience with a team of highly skilled and knowledgeable experts. The clients are from across industries and range from small scale to Fortune 500 companies in segments such as hospitality, manufacturing, retail, financial services, banks, education, healthcare, PSUs, government, and many more. The integrator's AV solutions and conferencing systems are a smart amalgamation of video, lighting, audio, infrastructure control, expert advice, and customer service – creating all-inclusive and adaptable solutions that are ideally suited to the individual requirements of clients.

**COMMUNICATION
MEDIA PRODUCTS**

CONSULTECHPRO, for the past five years, has been working across full audio-visual and ICT spectrum along with acoustic and stage lighting design by creating customised solutions to effectively communicate ideas with the selection of right products and best services across market segments. Leveraging design build experience to push the technology envelope, Consultechpro works independently designing and engineering client spaces to provide solutions that suit client needs and budget. Some of their highlight projects include the new PM museum, spread over 10,491 square metres, Atal Akshay Urja Bhawan – MNRE, Kashmir Institute of Excellence, Srinagar, and many more.

consultechpro
Consulting Technology Professionals

DIVERSIFIED envisions a world without boundaries, where every interaction moves closer to a more united and inspired world. Together with its clients, the systems integrator designs and delivers AV technology solutions like enhancing audience engagement, improving employee experiences, or securing and powering essential operations. Since 1993, the company's reputation has been built on being the go-to experts for experiences that require specialised knowledge and innovative solutions. With around 2700 associates worldwide in more than 60 countries, Diversified has been an efficient AV solutions provider and systems integrator since more than 30 years and has delivered more than 100 SMPTE ST 2110 / ST 2022 projects so far.

 **diversified**

DVSI combines technology expertise with strategic marketing communications insight to deliver compelling, high impact digital spaces for leading corporate organisations. The company's operations span major business hubs including Bangalore, Mumbai, Hyderabad, Chennai, and Delhi, delivering local expertise combined with global standards. The integrator's ability to manage large-scale, multi-site AV projects ensure seamless deployment and integration for global enterprises. DVSI's highlight projects include DSM Customer Experience Centre and Integrated Workspace Technology at AMPL in Hyderabad, Accenture Operations Centre in Bangalore, and many more.

 **dvsi**

Operational in Bangalore, Chennai, NCR, Pune, Mumbai, Hyderabad, Kolkata, Kochi, and Singapore, **EPITOME INFOTECH'S** system integration approach is a systematic combination of ensuring synergy between the primary function and human engineering principles. Epitome goes the extra mile to guarantee operator and maintenance-friendly installation with comprehensive engineering.

With over 18 years of experience, **EXODUS INFOTECH** is a trusted name in the AV and IT consulting industry. Based in Mumbai, Exodus specialises in designing and implementing high-performance audiovisual solutions tailored to clients' business needs. Their expertise spans across corporate offices, education, hospitality, healthcare, and government sectors ensuring reliable, future-ready technology integrations that elevate the way people communicate and operate.

EYTE TECHNOLOGIES PVT. LTD., headed by Managing Director, Abdul Waheed, is one of the leading audiovisual, IT, IoT, and acoustics consulting firm that delivers innovative, independent, and experience-driven solutions. With a strong foundation built on over two decades of industry expertise, EYTE has earned a reputation for designing and managing projects that seamlessly integrate technology with user needs. From conference rooms, town halls, and control centres to large-scale collaborative environments, we create spaces that enhance engagement, optimise performance, and deliver measurable value. Operating across India and Southeast Asia, EYTE has successfully executed hundreds of projects, becoming a trusted partner for corporates, financial institutions, government bodies, educational organisations, healthcare, and hospitality.

Eyte Technologies Pvt. Ltd.

GODREJ AV SOLUTIONS' robust audio-visual solutions transform spaces into immersive environments, enhancing the impact and effectiveness of presentations, lectures, and meetings. With more than 300 highly trained designers and engineers, Godrej AV has executed around 750 projects since its inception. With nearly 25 years of experience with diverse teams across India, the systems integrator has designed and delivered around 90 million square-feet of spaces.

HAVI DESIGN INDIA LLP is one of India's largest specialised system integration companies offering end-to-end solutions in professional audio, video, control, and lighting. With a focus on innovation and precision, the systems integrator designs and delivers customised AV experiences that transform venues and spaces into immersive environments. Over the last five years, HAVI Design has experienced remarkable growth and has earned the trust of leading brands and institutions with more than 300 projects completed so far. Some of its highlight projects include Bharat Mandapam – ITPO, Delhi Convention Centre & Exhibition Halls, IIM – Ahmedabad Smart Classrooms, IISER – Tirupati Smart Classrooms & Auditorium, IOC Reliance - Jamnagar (NOC Room), and MOPA Airport (Goa).

Since 2010, **HEWSHOTT INDIA** has delivered world-class spatial experiences to both local and international businesses in India. With two offices in the country, the consultant is fully set up to deliver projects across the country, including the rapidly developing southern Indian states. Hewshott offers local capability, global pedigree, corporate governance and unwavering independence. With a diverse set of skills and expertise gained from over 20 years spent working on projects here and around the world, Hewshott has the deepest understanding of the Indian market and how to deliver projects to international standards.

HMPL CONSULTING is one of the industry's leading independent consultancies with a diverse team of technocrats, each recognised as experts in their respective field of audio and acoustic engineering. Headquartered in India with branch offices in the UAE, UK, Philippines, Australia, and the US, HMPL has worked with some of the world's largest corporations across enterprise and has been part of several signature buildings in association with international leading architects and project managers across the globe. Founded in 2010, the consultancy specialises in audio visual design, acoustics design, project management, multimedia services, digital signage, ICT, programming, and IOT.

Headquartered in Bangalore, **IDEAS AHEAD AV SOLUTIONS** is a systems integration company that specialises in providing solutions for corporate, education, government, research labs, space departments, and PSU. With distinctive market approach, the integrator focuses on three main verticals – corporate AV, experience centre, and advanced visualisation. Founded in 2009, the integrator ensures they work closely with clients delivering high-end pro AV solutions across the country.

As one of India's premier AV solutions experts, **INNOVATIVE SYSTEMS AND SOLUTIONS (ISSPL)** crafts innovative audiovisual experiences that foster collaboration, productivity, and success. Their comprehensive services include AV design and integration, audiovisual installation services, and audio video consulting services. By partnering with ISSPL, organisations can inspire collaboration and engagement, drive business success through immersive AV experiences, and elevate communication and productivity. Since its inception in 1993, ISSPL has acquired many certifications and awards provide exceptional Audio, Video, and Lighting solutions through innovative design, seamless integration, and unparalleled customer service.

KINLY'S DNA is built on an established foundation of innovation, security and sustainability. With Kinly's 19 offices, spread over 11 countries, clients find the same commitment to innovation. Kinly holds more than 25 years of experience with around 2,500 happy customers and 1100+ employees worldwide. Kinly's strategic partnerships with leading technology manufacturers drive innovation, performance and reliability in every solution. Through a global network of trusted vendors, the company provides clients access to world-class technologies and emerging innovations at the best possible price point. The integrator's highly skilled and certified technical teams guarantee the safe and efficient delivery of complex AV projects across borders, spaces and devices.

METAHIVE DESIGN CONSULTING as a distinguished design consultancy, specialises in AI based AV, IoT, lighting and acoustics technologies. Situated in Bangalore, the AV consultancy is a trailblazer in design consulting, serving clients across PAN India. Metahive, launched in 2023, is on the path to unleash a world where communication and collaboration across employees, customers, and supply chains become more personal across all channels.

MULTEE PROE INDIA is one of the premier audiovisual technology consulting and trading firms that specialises in providing quality solutions to deliver high AV and digital experiences. The brand has catered to specific customer requirements from various segments and has a treasured customer base in IT Industry, public sectors, banks, corporates, universities with installations in engineering colleges, medical colleges, scientific research, training institutes, etc.

Established in 1994, **ONLINE INSTRUMENTS** is one of the leading systems integrators, having carved a niche by becoming a complete product and solutions provider in India with a global presence. They have fulfilled diverse customer requirements through their ability to provide specialised systems integration services as well as outstanding technical expertise and product solutions. Their team of industry professionals, with over 20 years of experience in the industry is focused on providing world-class solutions for our customers in the field of AV system integrations. From compact meeting rooms to 60,000-seat sports stadiums, Online Instruments provides AV solutions that integrate seamlessly with the larger ecosystem and perfectly align with business goals.

PAN INTELLECOM is also identified as one of the leading solution providers and system integrators of audio-video solutions, video surveillance, interactive solutions, security and allied products. Since the past two decades, they have diversified and strengthened arena of services and attained strong and long-term associations with some of the leading companies across the globe.
